Vigilo

SOLUTIONS

Integration solutions

GPS integrations, API and B2B telemetry.

20+ years
of experience

163,842
connected vehicles

9 countries
with our own offices

24/7
support

State-of-the-art integrations

Our integration system is designed to make it easy to connect with external platforms through a B2B integration services layer, built on HTTP REST technology with data exchange in JSON format. This architecture enables fast, secure and standardised integration, with no proprietary dependencies or complex development work.
