Vigilo

ACCESSORIES

One click to start. One click to call for help.

A Bluetooth key fob with two buttons: the ID button enables the ignition only for authorised drivers, and the SOS button sends an instant alert with the GPS position to the Vigilo platform.

Bluetooth 5.1 · **Up to 240 m*** · **Battery up to 500 days*** · **IP41** · **Replaceable battery**

2 buttons — ID and SOS

240 m — Bluetooth range in open field*

500 days — of battery life*

13 g — fits on any key ring

TWO BUTTONS

Everything you need, in the driver's pocket

- Ignition enabled only for people you authorise
- Every trip assigned to its driver
- Alert if someone tries to start without a fob
- Instant alert on the platform and the app
- GPS position, time and driver
- Notification and email to whoever you choose

WHAT YOU GET

More control and more safety for your fleet

Know who is driving

Each fob belongs to one person: you know who drives each vehicle on every trip.

Stop unauthorised use

Without an approved fob nearby, the vehicle cannot be used, after hours or by anyone else.

Immediate help

The SOS button instantly alerts your control centre with the exact location so you can act fast.

Private and business mileage

Separate private trips from business trips and get reports by driver.

HOW IT WORKS

From the key fob to your screen

One fob per driver

We register each fob on the platform and link it to a driver.

ID when getting in

The driver presses the ID button; the tracker recognises it and enables the ignition.

Instant alerts

If SOS is pressed, the platform and the app show the alert with the position and notify your team.

TECHNOLOGY

Small, tough and with over a year of battery

Long-range Bluetooth 5.1

Up to 240 m in open field*. The tracker detects it as soon as the driver gets in.

Up to 500 days of battery

Standard 220 mAh coin cell that can be replaced in seconds, with no special tools.

IP41 rated

Protected against dust and water drops for everyday use in a pocket or on a key ring.

Wireless set-up

Configured over Bluetooth, with remote firmware updates and no need to collect it.

Want to know who is driving each vehicle?

We will prepare a proposal with the key fobs your fleet needs.

* Range in open field with no obstacles; it is shorter inside a vehicle. Battery life at 25 °C transmitting every 10 seconds; it varies with use. Requires a Vigilo tracker with Bluetooth and, to control the ignition, an immobiliser installation. Images for illustration only: the model and shape of the devices may vary.
